در این حالت زمان صرف شده برای محاسبات هر نخ جداگانه محاسبه شده و با هم میانگین گیری شده است. بنابراین زمان **overhead** نخ ها در نظر گرفته نشده است.

زمان های محاسبه شده در این روش بسیار نزدیک به مقادیر روش محاسبه دیگر (در فایل اکسل اول) هستند که این موضوع نشان می دهد **overhead** نخ ها تاثیر بسزایی در نتایج محاسبات ماتریسی ندارند. تمامی روابط لگاریتمی و خطی در حالت اول در این حالت نیز برقرار می باشد.

مقایسه کلی
